CEO MESSAGE

On behalf of Hoang Tam, I would like to express my sincere gratitude to all our stakeholders for their trust and support. Since our establishment, we have built strong relationships based on our core values, allowing us to deliver excellence at every level. These foundations have enabled our continuous growth, strengthening both our local and international partnerships.

At Hoang Tam, we are committed to upholding the highest standards through international quality benchmarks, following ASME standards, and continuously improving our processes. Our dedicated team, outstanding services, and unwavering commitment to innovation ensure that we set new standards in stainless steel fabrication and installation.

We serve and collaborate with our customers based on trust, just as reflected in our slogan:

“Your Trust – Our Values.”

We look forward to a future filled with collaboration and shared success.

Best regards,

LE NGOC HIEN (JOHN)

INTRODUCTION

Hoang Tam specializes in stainless steel fabrication, complying with ASME standards and following ISO 9001 and ISO 45001 processes, while also being ECOVADIS certified.

Established in 2018, Hoang Tam is committed to quality, manufacturing stainless steel tanks, process equipment, and complete systems that meet ASME compliance and adhere to ISO 9001 and ISO 45001 standards. Our expertise ensures high-quality fabrication, material selection, and testing, supported by a world-class workforce trained to handle all your projects with precision and excellence.

Our services are highly valued by industries that require strict hygiene standards, such as food & dairy, brewery – beverage & wine, chemical – cosmetic, pharmaceutical, and paint industries, among others.

As a leading stainless steel fabricator for multinational companies, we strictly follow ISO 9001 and ISO 45001 processes, ensuring continuous improvement and optimal solutions for our customers.

Beyond stainless steel tanks, we provide complete solutions, including design, piping, installation, and other components, along with full commissioning services for all types of equipment.

We are honored to collaborate with engineering companies such as GEA, SICCA DANIA, TetraPak... and more, as well as end-users including Kerry Ingredients, Pepsico, Sanofi, Abbott, Vinh Hoan Collagen, Betrimex... and many others.

1

OUR VISION

To be the leader in high-quality stainless steel fabrication, providing innovative solutions for industries such as food, beverage, chemical, and pharmaceutical in Vietnam and beyond, with a focus on excellence and sustainability through 2030.

2

OUR MISSION

To consistently deliver innovative and world-class product solutions that uphold global standards, ensuring excellence and reliability in every project we undertake.

3

CORE VALUES

CARE

We care for our stakeholders: our customers, our suppliers, our staff and the environment in which we operate. Our success is based on this.

SAFETY

We place safety first, for our customers and for our staff. No amount of Increase in profit or savings in time justifies an unsafe action.

QUALITY

We provide products and services that are high quality consistently standards to European Hoang Tam's reputation is founded on this. We do not risk Hoang Tam's reputation by any actions which may undermine this.

CONTINUOUS IMPROVEMENT

We always look for ways to Improve our products and services and the ways we deliver them.

| CORE COMPETENCIES

TURNKEY PROJECT SPECIALIZATION

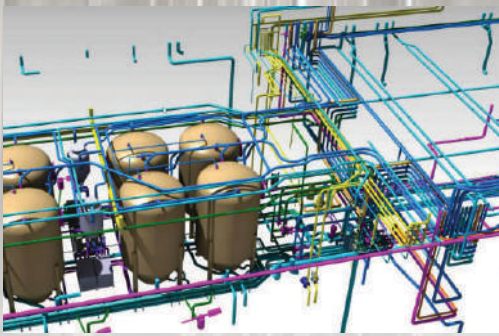

Every project has its own unique beginning and conclusion, and ensuring everything in between runs smoothly is essential. That's why Hoang Tam takes pride in offering turnkey services in specific industry segments where we have expertise, including Pharmaceutical, Food and Beverage, and Chemical sectors.

Our dedicated team has successfully developed effective solutions over the years, and this area of our work is a testament to our capabilities and accumulated experience. We possess the creativity and design knowledge required to assemble complete lines in these specialized fields, helping to reduce costs, minimize downtime, and avoid complications. Moreover, we are committed to ensuring that your project proceeds seamlessly and meets operational requirements.

Our collaboration with multinational companies in these industries demonstrates the reliability of our designs, even under demanding conditions, giving you the confidence that they will perform as expected without issue.

“Hoang Tam commits:
To always respond and
fulfill our customers' needs”

DESIGN

supported by a highly skilled team of design engineers proficient in 2D modeling using AutoCAD and 3D modeling with SolidWorks and Inventor.

We have also integrated advanced agitator design and calculation software into our workflow. As a testament to this expertise, we have successfully designed and manufactured a variety of agitators since our inception, including numerous sizes and speeds, three-stage blenders, and multi-agitator systems tailored for select clients.

FABRICATION

Expertise in Stainless Steel Fabrication Hoang Tam possesses extensive knowledge and experience in stainless steel fabrication, ensuring the highest quality standards for every project. We exclusively use premium raw materials from renowned suppliers across Europe and the global, including trusted brands in stainless steel fabrication. Typical projects utilize grades such as 304, 304L, 316, and 316L stainless steel, and we are fully equipped to meet specific material requirements based on client needs.

Our reputation for excellence has earned the trust of customers worldwide in industries such as pharmaceutical, chemical, food and beverage, brewery, cosmetics, and paint, among others. Collaborating with some of the world's leading brands has provided us with invaluable insight into production processes, allowing us to execute even the most complex designs and challenging projects with precision.

INSTALLATION SERVICES

At Hoang Tam, we approach every installation project with the utmost care and commitment, as though it were our own. Our advanced installation techniques are designed to ensure that every stainless steel task is executed seamlessly and efficiently. Supported by our certified welders, quality control specialists, and Health and Safety professionals, we guarantee a smooth and successful completion of projects by closely collaborating with all stakeholders to uphold our quality standards.

Whether it's a piping system or the onsite construction of large-scale equipment such as tanks and silos, Hoang Tam is committed to getting it right the first time. Our goal is to optimize onsite operations by completing installations with precision, giving you peace of mind for years to come.

We offer a wide range of installation options and have the capability to handle onsite construction for projects that exceed standard transport dimensions, ensuring that even the most complex installations are managed with care and expertise.

HSE POLICY

HEALTH & SAFETY

Aiming at maximizing customer satisfaction, Hoang Tam proudly commits to:

1. Duly comply with legal requirements and regulation relative to occupational health, safety and environmental protection.
2. Establish and maintain safe working condition, prevent injury and health deterioration for our employees, leading to a sustainable development.
3. Ensure widespread promotion on safety, health and environment requirements to all employees, contractors, suppliers as well as individuals who are potentially affected by our business operation.
4. Effectively sustain occupational health, safety and environment system, uphold continual improvement, and ensure all operations are in accordance with ISO 45001 standards requirements.

QUALITY ASSURANCE |

ENVIRONMENT

1

We care for our environment. We are committed to the efficient use of resources, reducing and preventing pollution, and promoting product stewardship.

Hoang Tam is proud to have been awarded the ****ECOVADIS Bronze Medal****, recognizing our dedication to sustainability and responsible business practices. This achievement reflects our commitment to minimizing environmental impact, ensuring ethical labor practices, and maintaining high standards in business integrity.

****CERTIFICATIONS & COMPLIANCE****

- ****ISO 9001 (QMS) & ISO 45001****, certified by ****SGS****.
- ****ECOVADIS Bronze Medal****, awarded for our sustainability and corporate social responsibility efforts.

QUALITY CONTROL

2

Product quality is strictly controlled at every step of the fabrication process. We conduct full quality control testing to ensure all products meet the required specifications before being delivered to end users.

OUR COMMITMENTS

3

1. Continuously improve and enhance product quality while ensuring timely delivery and maintenance.
2. Select dependable suppliers to ensure high-quality materials at reasonable prices.
3. Effectively sustain the ****Quality Management System****, uphold continual improvement, and ensure all operations comply with ****ISO 9001**** standards.

DESIGN CAPABILITY

Hoang Tam excels in delivering comprehensive engineering solutions tailored to meet your specific requirements. We understand that every project demands a unique design, and we are committed to providing the precise solution to fulfill it.

To ensure quick and effective responses to any engineering challenge, we grant our customers direct access to our technical department. Our design team, consisting of approximately 15 highly experienced professionals in mechanical engineering, brings a wealth of expertise to every project.

We offer detailed designs and CAD drawing services for projects of any scale, utilizing AutoCAD for 2D designs and SolidWorks and Inventor for 3D modeling. Additionally, we perform pressure tank calculations with PV Elite and agitator calculations with Cerebromix, enabling us to optimize designs for functionality and reliability.

Our comprehensive capabilities allow customers to visualize their projects from every perspective and ensure that our solutions align seamlessly with their operational goals.

FACILITIES |

Hoang Tam is proud to operate a state-of-the-art stainless steel manufacturing facility, equipped with a comprehensive array of advanced machinery. These cutting-edge technologies are operated by a team of highly skilled and experienced technicians, ensuring that every product meets the highest quality standards.

Our dedication to excellence is reflected in our robust investments in equipment and the expertise of our workforce. This combination allows us to deliver reliable and superior results across all projects.

Our facilities feature:

Crane systems, Column & Boom auto plasma welding, Semiautomatic de-coiler & flattening, Seam plasma automatic welding, CNC plasma cutting, Hydraulic dish press, Hydraulic rolling, Dimple welding, Orbital & TIG welding, Hydraulic shearing, CNC polishing, Hydraulic forming, Testing & measuring equipment, Mobile operating equipment, Specialized equipment for on-site manufacturing

And more At Hoang Tam, we are committed to using the finest resources and the expertise of our professional team to consistently exceed customer expectations.

PRODUCT RANGE

JACKET TANKS

Jacket tanks are regularly designed and fabricated to be supplied to customers in a few types. We are able to meet demands of up to 40 bar with our automatic dimple welding machine, and supplying both the highest quality and best looking finish. Every jacket chamber is then tested before insulation work is done.

MIXING & PRESSURE TANKS

Mixing Tanks made by Hoang Tam are designed, engineered and fabricated to meet European standards. The configurations designed by engineers of Hoang Tam have been proven for their reliability and dependability in the processing of beer, wine, juice, dairy, chemicals, confectionery and many other products.

STORAGE TANKS

Our storage tanks and vessels are regularly provided for beer, wine, juice, chocolate, dairy, chemical and many other products.

MILK ROAD TANKER

PRODUCT RANGE

INSULATED EQUIPMENT

Are designed to your specific operational, wind load and extreme hot or cold conditions. The custom design incorporates a choice of insulation materials and sheathings in various thicknesses, finishes and colors. Using only the highest quality materials and construction standards results in exceptional products capable withstanding nearly all challenges.

PIPING DESIGN

At Hoang Tam, we excel in the design, fabrication, and installation of complex piping systems. Our skilled teams ensure optimal sequencing during both fabrication and installation, managing material handling and layout serviceability with precision. Equipped with state-of-the-art machinery for stainless steel welding and assembly, we are committed to efficiency and superior quality.

Leveraging our extensive expertise, your projects benefit from cost-effective quality control through the use of prefabricated piping—an advantage that drives project success and enhances profitability. You can have full confidence that when you work with us, your piping systems are constructed using premium materials in strict adherence to the ASME IX-approved welding procedures

INSTALLATION |

At Hoang Tam, we go beyond design and fabrication—we deliver exceptional installation services across machinery, piping networks, and electromechanical systems. Our highly skilled teams ensure each project is executed with precision, carefully coordinating every installation step to achieve optimal performance.

Backed by state-of-the-art equipment and managed by a team of experienced professionals, we handle projects of all sizes, including large-scale initiatives, with unwavering commitment. When you partner with Hoang Tam, you can trust that every system is installed to the highest international standards, ensuring superior quality, efficiency, and a seamless integration into your operational framework.

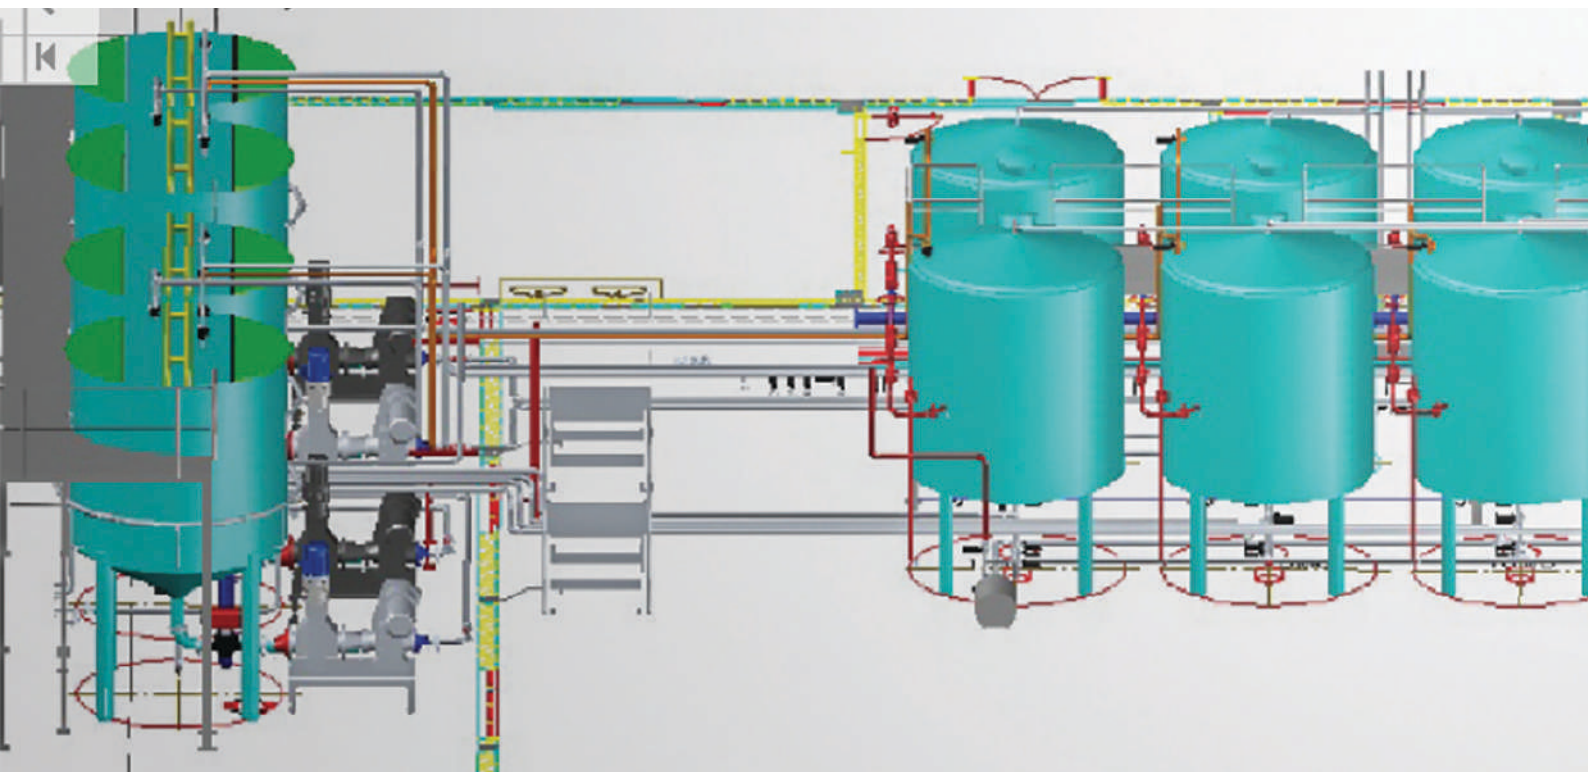

M & E SYSTEM

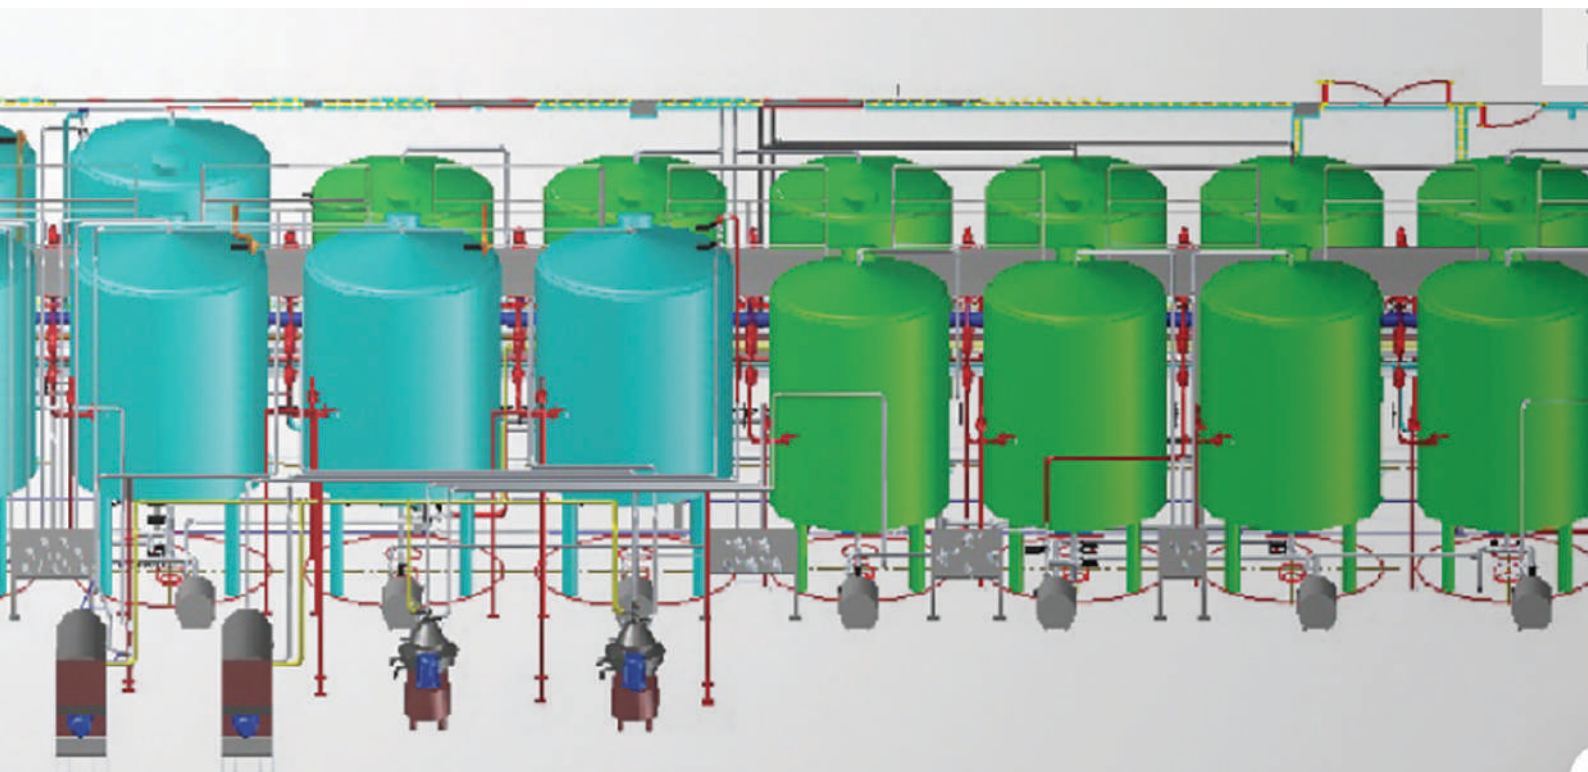

Hoang Tam provides advanced Mechanical and Electrical (ME) system solutions integrated with SCADA (Supervisory Control and Data Acquisition) technology to meet the specific requirements of each customer. We specialize in programming and installing systems customized to your operational needs, ensuring seamless control and efficiency.

Our experienced engineers develop tailored SCADA programming, enabling real-time monitoring, automation, and improved system performance. From initial design to installation, we focus on precision and innovation, ensuring that every detail is executed effectively.

With a strong commitment to quality and adaptability, Hoang Tam delivers ME system solutions that comply with global standards, offering reliability and long-term value. By treating every project as our own, we ensure results that align perfectly with your expectations.

PROCESSING EQUIPMENT

PHARMACEUTICAL LINE

Our experience in building and optimizing pharmaceutical production systems enables us to help you create the perfect system for your needs, fully customized for both low- and high-volume applications. Our systems manage every stage of the process, from raw material preparation and waste disposal to dissolving, filtering, storing, blending, piping, sterilization (UHT), and filling systems.

LIQUID DETERGENT LINE

Our experience building and optimizing tea extraction systems enables us to help you create the perfect system for your needs and can be totally customized to allow for low or high volume applications. Our systems handle everything in the line starting with the brewing and disposal of spent leaves, through to dissolving, filtering, storing, blending, piping, UHT, and filling systems.

CIP SYSTEM

Clean in place systems produce better products and cleanliness and fully integrated volutions that from singk our life easier so that you com of them by maximising system. Our systems can be be custom built skid We handle everything lines, and can produce CIP systems that can handle any volume of flow including both single pass and recirculation.

CHEMICAL MIXING

Chemical mixing is no small task, and is how many of the products we use today in our everyday lives are created. Hoang Tam is an experienced partner in working with bath Industrial and FMCG applications for this type of processing equipment and is able to build high quality, energy efficient, high yield, and consistent liquid chemical moing systems.
